

GENDER PAY REPORTING 2020

First Response
take care of your finance

GENDER PAY REPORTING

The gender pay gap is defined as the difference between the average earnings of men and the average earning of women. This is different from equal pay which legally requires men and women who carry out the same jobs, similar jobs or work of equal value to receive the same pay.

The approach that we take at First Response Finance when rewarding our workforce is based on fairness and we believe we have robust processes in place to ensure that our employees are treated equally. We are confident that men and women are both paid equally for doing equivalent roles across our business departments and sites.

Our gender pay reporting figures for both mean and median hourly rate and bonus are entirely reflective of our organisation. First Response Finance has more male employees working in senior position and because of this our average male salary is higher than our females. Despite this, 66.7% of our current Leadership Academy cohort are females which demonstrates our commitment to developing our future female leaders.

This pay gap will continue to exist until we reach a more equitable split of male and female employees in all roles and at all levels. We commit to continually reviewing our employee salaries to maintain equality, fairness and transparency.
